

# Face Verification and Binary Classification \*CORRECTION\*

At 2:08, Andrew should have written  $w_k$  instead of  $w_i$ .

So the formula should be:

$$y_{hat} = \sigma \left( \sum_{k=1}^{128} w_k |f(x^{(i)})_k - f(x^{(j)})_k| + b \right)$$

Mark as completed
